EDUCATION

National Institute of Technology Agartala
Bachelor of Technology in Electrical Engineering

2023 – 2027
CGPA - 8.26

WORK EXPERIENCE

TakeUforward

July - September 2025

Technical Content Writer

Internship

- Drafted and revamped **200+ articles** on Data Structures and Algorithms, improving clarity and technical understanding for a community of **1.2 million+ learners**.
- Created **visual explanations** and detailed code walkthroughs in **C++, Python, and JavaScript**, guiding learners from **brute-force** to **optimized algorithmic solutions**.

PROJECTS

Live Auction Platform | *LIVE*

[GitHub](#)

- Built a **real-time, event-driven auction system** handling **concurrent user bids** with **race-condition prevention** using Node.js, Express, and Socket.io.
- Implemented **server-authoritative state management** and **synchronized countdown timers** to ensure **data consistency** across multiple clients.
- Designed APIs to handle **high-frequency events**, **atomic bid updates**, and real-time broadcasts with low latency.
- Deployed a **scalable full-stack system** using **Docker** with environment-based configuration, secure **CORS** policies, and **cloud hosting** on Render and Vercel.
- **Tools:** React, Vite, JavaScript, CSS, Node.js, Express.js, Socket.io, Docker, Render, Vercel.

Contest Rating System | *LIVE*

[GitHub](#)

- Engineered a **percentile-based rating algorithm** (Codeforces-inspired) with a **6-tier progression system** (Newbie → Grandmaster), computing rating delta in a single pure-function pass.
- Designed a **3-table PostgreSQL schema** with foreign key constraints, cascade deletes, and **4 performance-optimized indexes**; versioned via **golang-migrate** for reproducible deployments.
- Built **8 RESTful API endpoints** in Go (Gin) with a clean **handler → service → repository** architecture and **atomic transactional batch updates** across all contest participants.
- **Tools:** Go, Gin, PostgreSQL, golang-migrate, Next.js 15, TypeScript, Recharts, Docker, Render, Vercel.

ReWear — Odoo Hackathon Project | *LIVE*

[GitHub](#)

- Built a **full-stack web application** for swapping and redeeming clothes via a point-based system.
- Implemented **authentication**, item uploads, swap and redeem workflows, an **admin moderation dashboard**, and **structured REST APIs**.
- Collaborated in a **team environment** and used **structured reviews** to improve solution **quality and consistency**.
- **Tools:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Cloudinary, Git.

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, TypeScript, Go, SQL
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML, CSS
- **Backend:** Node.js, Express.js, Go (Gin), Socket.io, JWT, Mongoose
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools:** Git, GitHub, Docker, Postman, VS Code
- **CS Fundamentals:** Data Structures and Algorithms, Object Oriented Programming, System Design .

ACHIEVEMENTS

- **500+ DSA Problems** — [LeetCode](#), [GeeksforGeeks](#).
- **Odoo Hackathon 2025 Finalist** — Top 300 of 19,000+ teams.
- **Adobe India Hackathon 2025** — Selected for Round 2 from 250,000+ participants.

POSITION OF RESPONSIBILITY

- **Head Of Design, E-CELL NIT Agartala:** Design Lead with responsibility for final design approvals and supervision of a 10-member team, ensuring delivery of high quality digital posters for branding, festive, and event communications in alignment with organizational standards.
